ELSEVIER

European Journal of Operational Research 85 (1995) 691–692

EUROPEAN JOURNAL OF OPERATIONAL RESEARCH

Contents Volume 85

1 Theoretical models of sales promotions: Contributions, limitations, and a future research agenda (Invited Review)
J.S. Raju

18 A classified bibliography of recent research relating to project risk management
T. Williams

39 A proposal on improved procedures for estimating task-time distributions in PERT
H.-S. Lau and C. Somarajan

53 A neural network for classifying the financial health of a firm
R.C. Lacher, P.K. Coats, S.C. Sharma and L.F. Fant

66 Financial statement planning in the presence of tax constraints
B. Back and R.J.R. Back

82 Optimal investment policies for a polluting firm in an uncertain environment
P.M. Kort

97 Determining the optimal warranty price based on the producer's and customers' risk preferences
Y.H. Chun and K. Tang

111 The impact of information timeliness on the predictability of stock and futures returns: An application of vector models
R. Östermark and H. Hernesniemi

132 Period and phase of customer replenishment: A new approach to the Strategic Inventory/Routing Problem
I.R. Webb and R.C. Larson

149 A single-server retrial queue with server vacations and a finite number of input sources
H. Li and T. Yang

161 Delay analysis for discrete-time queueing systems with multiple randomly interrupted servers
K. Laevens and H. Bruneel

178 Approximate analysis for queueing networks with finite capacity and customer loss
L. Shi

192 Brownian motion approximations for tankage assessment and stock control
R.A.J.J. Nieboer and R. Dekker

205 Validation and statistical analysis procedures under the common random number correlation-induction strategy for multipopulation simulation experiments
S. Joshi and J.D. Tew

221 OR Software
ORSEP – Operations Research Software Exchange Program, *H.W. Hamacher (ed.)*
HOPDM (version 2.12) – A fast LP solver based on a primal–dual interior point method, *J. Gondzio*

226 Short Book Reviews, *L.F. Gelders (ed.)*

229 Interactions between operational research and environmental management (Invited Review)
J.M. Bloemhof-Ruwaard, P. van Beek, L. Hordijk and L.N. Van Wassenhove

244 The search for information – A patient perspective on multiple opinions
A. Mehrez, Y. Yuan and A. Gafni

263 Talking to Sibilla: An approach to context dependent natural language comprehension
G. Felici

282 A stochastic programming model for money management
B. Golub, M. Holmer, R. McKendall, L. Pohlman and S.A. Zenios

297 A unified framework for the selection of a Flexible Manufacturing System
J. Shang and T. Sueyoshi

316 Accounting for complexity in costing high technology manufacturing
W.W. Cooper, K.K. Sinha and R.S. Sullivan

327 A comparison of stochastic scheduling rules for maximizing project net present value
K.K. Yang, L.C. Tay and C.C. Sum
340 Optimal inspection effort and scheduling for a manufacturing process with repair
E.M. Jewkes
352 On performance measures for evacuation systems
G.G. Løvås
368 A maximin procedure for the optimal insertion timing of ad executions
P.V. Sundar Balakrishnan and N.G. Hall
383 Multiobjective optimization of table olive preparation systems
G.C. Kopsidas
399 Distributional efficiency in multiobjective stochastic linear programming
F. Ben Abdelaziz, P. Lang and R. Nadeau
416 A bibliography of expert system applications for business (19–1992)
B.K. Wong and J.A. Monaco
433 Short Book Reviews, *L.F. Gelders (ed.)*

435 Productivity measurement in industrial operations (Invited Review)
E.F. Sudit
454 Confidentiality control of tabulated data: Some practical network models
J.A. George, J.K. Chong and B.J. Ring
473 Three practical criteria of comparison among ordinal preference aggregating rules
J. Pérez and S. Barba-Romero
488 Multiperiod allocation of substitutable resources
R.S. Klein, H. Luss and U.G. Rothblum
504 Method for evaluating the strength of retarding steps on a marshalling yard hump
Z.Ž. Avramović
515 Minimizing makespan for flow shop scheduling by combining simulated annealing with sequencing knowledge
S.H. Zegordi, K. Itoh and T. Enkawa
532 Optimal setup time reduction for a single product with dynamic demands
M. Diaby
541 Minimizing total tardiness in permutation flowshops
Y.-D. Kim
556 Optimal lot streaming for multiple products in a two-machine flow shop
R.G. Vickson
576 Minimization of agreeably weighted variance in single machine systems
X. Cai
593 Backtracking of jobs in one-dimensional machine location problems
B.R. Sarker, W.E. Wilhelm, G.L. Hogg and M.-H. Han
610 A result on projection for the Vehicle Routing Problem
L. Gouveia
625 Average shadow price in a Mixed Integer Linear programming problem
A. Crema
636 Extended optimal replacement model with random minimal repair costs
S.-H. Sheu, W.S. Griffith and T. Nakagawa
650 Periodicity of the profile process in Markov manpower systems
I.I. Gerontidis
670 Stochastic analysis of a non-homogeneous Markov system
N. Tsantas
686 Short Book Reviews, *L.F. Gelders (ed.)*
689 OR Software, *H. Thiriez*
691 Contents Volume 85
